

**RNSG 1030B Maternal-Child Nursing  
COURSE SYLLABUS  
Spring Semester 2021**

**DUE TO COVID 19, this syllabus is subject to change. If changes are made, you will be notified as soon as possible.**

**COURSE INFORMATION**

Credit Hours/Minutes: 6/7500

Didactic: 4 (3000 minutes)

Clinical: 2 (4500 minutes)

Campus/Class Location: Swainsboro Campus/Building 8 Room 8136; please be aware that due to COVID, the backup plan for class location is via Georgia Virtual Technical College Connection (GVTC)/Blackboard Collaborate.

Class Meets: On Tuesdays beginning 1/12-3/2 from 9:00 am-6:00 pm; excluding one hour for lunch.

Clinical: Clinical hours will vary

Course Reference Number (CRN): 40283

**INSTRUCTOR CONTACT INFORMATION**

Instructor Name: Beth Hendrix, Master of Public Health (MPH), Master of Science in Nursing (MSN), Registered Nurse (RN), Lead Instructor for maternity/newborn portion of class  
(Another ASN instructor may fill in and teach at any time)

Campus/Office Location: Swainsboro Campus/Building 8 Room 8121

Office Hours: Mondays from 9:00 am-11:00 am & 1:00 pm-4:00 pm by appointment

Email: [Beth Hendrix \(bhendrix@southeasterntech.edu\)](mailto:bhendrix@southeasterntech.edu)

Phone: 478-289-2284

Fax Number: 478-289-2336

Tutoring Hours: Please schedule an appointment

Preferred Method of Contact: EMAIL

Instructor Name: Christina Johnson, Master of Science in Nursing (MSN), Registered Nurse (RN), Critical Care Registered Nurse (CCRN), Trauma Certified Registered Nurse (TCRN), Lead Instructor for pediatric portion of class

(Another ASN instructor may fill in and teach at any time)

Campus/Office Location: Swainsboro Campus/Building 8 Room 8119

Office Hours: Mondays from 9:00 am-11:00am & 1:00 pm-4:00 pm by appointment.

Email: [Christina Johnson \(mailto:cjohnson@southeasterntech.edu\)](mailto:cjohnson@southeasterntech.edu)

Phone: 478-289-2284

Fax Number: 478-289-2336

Tutoring Hours: Please schedule an appointment via email

Preferred Method of Contact: EMAIL

*All communication with faculty should be completed using STC email. Please note that emails sent during*

business hours will be answered within 24-48 hours. Emails sent during holidays and on weekends may not be answered until the next business day.

## **SOUTHEASTERN TECHNICAL COLLEGE'S (STC) CATALOG AND STUDENT HANDBOOK**

Students are responsible for all policies and procedures and all other information included in Southeastern Technical College's [Catalog and Handbook](https://catalog.southeasterntech.edu/college-catalog/downloads/current.pdf) (<https://catalog.southeasterntech.edu/college-catalog/downloads/current.pdf>).

### **REQUIRED TEXT**

1. Durham, R. & Chapman, L. (2019). *Maternal-newborn nursing* (3rd ed.). FA. Davis.
2. Rudd, K. & Kocisko, D. (2019). *Pediatric nursing* (2th ed.). FA. Davis.
3. Doenges, M., Moorhouse, M., & Murr, A. (2019). *Nursing care plans: Guidelines for individualizing client care across the life span* (10th ed.). F. A. Davis.
4. Assessment Technologies Institute (ATI) Virtual Simulation and testing services

### **REQUIRED SUPPLIES & SOFTWARE:**

Pen, pencil, paper, large 3 ring binder, highlighter, laptop, computer access, ear phones for ATI skills modules, folder with pockets, calculator

**Students should not share login credentials with others and should change passwords periodically to maintain security.**

Laptop computers are REQUIRED with the following suggested specification:

- Processor i5 or i7
- Memory 8GB or higher
- Hard drive 250GB or larger
- Get a DVD Drive either internal or external
- Webcam with microphone is required
- ATI Internet Requirements: A minimum internet speed of 5 Mbps is required (10 Mbps or more is recommended). Test your internet speed using [www.speedtest.net](http://www.speedtest.net)

### **COURSE DESCRIPTION**

This course provides an integrative, family-centered approach to the care of women, newborns, and children. Emphasis is placed on normal and high-risk pregnancies, normal growth and development, family dynamics, common pediatric disorders and the promotion of healthy behaviors in clients. Management and planning of the nursing process will include concepts from a variety of culturally diverse settings and nursing in the community and acute care setting. The role of the nurse as a provider will include: client-centered care; teamwork and collaboration; evidence-based practice; quality improvement; safety; informatics; professionalism; and leadership. Clinical experiences provide the student an opportunity to apply theoretical concepts and implement safe client care to women, newborns, and children in selected settings.

### **MAJOR COURSE OUTCOMES**

1. Perform a focused health assessment of women, newborns, and children that identifies deviations from normal, as well as health risks.
2. Develop an individualized, evidence based plan of care that demonstrates an appreciation of the diverse backgrounds and developmental variations of women, newborns, and children while making recommendations for the adoption of health-promoting behaviors.
3. Demonstrate clinical judgment when managing the care of women, newborns and children.

4. Identify knowledge of pharmacology, pathophysiology, nutrition, established evidence-based practices and concepts from previous nursing courses when caring for women, newborns, and children.
5. Relate evidence-based knowledge in the management of care provided to women, newborns, and children.
6. Evaluate the efficacy of health-related education that has been provided to women, newborns, and children.

#### **PREREQUISITES**

Program admission, RNSG 1018B, RNSG 1019B

#### **CO-REQUISITES**

None

#### **CONTENT OUTLINE/UNIT OUTCOMES**

##### **Trends in Maternal Health Care**

| <b>Order</b> | <b>Description</b>                                               | <b>Learning Domain</b> | <b>Level of Learning</b> |
|--------------|------------------------------------------------------------------|------------------------|--------------------------|
| 1            | Discuss the effect of current trends on maternal health care.    | Cognitive              | Understanding            |
| 2            | Discuss the role of the nurse in women's/maternal health care.   | Cognitive              | Understanding            |
| 3            | Describe the role of the family during the perinatal experience. | Cognitive              | Understanding            |

##### **Legal/Ethical Issues**

| <b>Order</b> | <b>Description</b>                                            | <b>Learning Domain</b> | <b>Level of Learning</b> |
|--------------|---------------------------------------------------------------|------------------------|--------------------------|
| 1            | Identify current legal/ethical issues in reproductive health. | Cognitive              | Remembering              |

##### **Reproductive Health Care**

| <b>Order</b> | <b>Description</b>                                                                                                                                          | <b>Learning Domain</b> | <b>Level of Learning</b> |
|--------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|--------------------------|
| 1            | Discuss advantages and disadvantages of contraception.                                                                                                      | Cognitive              | Understanding            |
| 2            | Discuss the pathophysiology, clinical manifestations, medical management and nursing care of clients who have common Sexually Transmitted Infection (STIs). | Cognitive              | Remembering              |
| 3            | Identify the diseases known as TORCH (toxoplasmosis, rubella, cytomegalovirus, herpes virus, hepatitis and syphilis) infections.                            | Cognitive              | Understanding            |
| 4            | Describe the implications TORCH infections may have on the mother and fetus/infant during the perinatal experience.                                         | Cognitive              | Understanding            |
| 5            | Describe the potential effects of Group B streptococcus on the mother and fetus/infant.                                                                     | Cognitive              | Understanding            |
| 6            | Discuss the medical and nursing management of mothers/babies affected with TORCH infections or Group B streptococcus.                                       | Cognitive              | Understanding            |

### Alteration in Reproduction - Maternal

| Order | Description                                                                                                                                                      | Learning Domain | Level of Learning |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|-------------------|
| 1     | Recognize components of a focused assessment that should be included when collecting data on women who have an alteration in reproduction.                       | Cognitive       | Remembering       |
| 2     | Discuss knowledge of anatomy, physiology, pathophysiology, and nutrition variations when helping to plan care for women who have an alteration in reproduction.  | Cognitive       | Understanding     |
| 3     | Identify priority actions for women who have an alteration in reproduction.                                                                                      | Cognitive       | Remembering       |
| 4     | Apply knowledge of the actions, potential side effects, and nursing implications when administering medications to women who have an alteration in reproduction. | Cognitive       | Applying          |
| 5     | Recognize alterations in laboratory values related to alterations in reproduction.                                                                               | Cognitive       | Remembering       |
| 6     | Describe the role of the nurse in providing quality care to women who have an alteration in reproduction.                                                        | Cognitive       | Understanding     |
| 7     | Identify health care education and safety needs for women who have an alteration in reproduction.                                                                |                 | Remembering       |

### Antepartum Care

| Order | Description                                                                                                                      | Learning Domain | Level of Learning |
|-------|----------------------------------------------------------------------------------------------------------------------------------|-----------------|-------------------|
| 1     | Discuss the components in the physical and psychosocial assessment of the pregnant woman.                                        | Cognitive       | Understanding     |
| 2     | Describe physiological changes that occur in the pregnant woman during the normal antepartum period.                             | Cognitive       | Understanding     |
| 3     | Discuss nutritional needs of the pregnant woman and the effects of poor nutrition on the mother and baby.                        | Cognitive       | Understanding     |
| 4     | Describe common diagnostic procedures/tests that may be used during the antepartum experience.                                   | Cognitive       | Understanding     |
| 5     | Identify commonly prescribed and over-the-counter medications used during the antepartum period.                                 | Cognitive       | Remembering       |
| 6     | Discuss the effects of medications used during the antepartum period and their nursing implications.                             | Cognitive       | Understanding     |
| 7     | Describe health education needs of the pregnant woman during the antepartum period.                                              | Cognitive       | Understanding     |
| 8     | 8. Describe common complications of pregnancy identified during the antepartum experience and appropriate nursing interventions. | Cognitive       | Understanding     |

| Order | Description                                        | Learning Domain | Level of Learning |
|-------|----------------------------------------------------|-----------------|-------------------|
|       | <u>Demonstration/Discussion/Skill Performance:</u> | Psychomotor     | Guided Response   |
|       | a. Calculation of delivery date                    |                 |                   |
|       | b. Auscultation of fetal heart rate                |                 |                   |
|       | c. Assessment of fundal height                     |                 |                   |

### Intrapartum Care

| Order | Description                                                                                                                   | Learning Domain | Level of Learning |
|-------|-------------------------------------------------------------------------------------------------------------------------------|-----------------|-------------------|
| 1     | Describe the four stages of labor.                                                                                            | Cognitive       | Understanding     |
| 2     | Describe the nursing assessment components for each stage of labor.                                                           | Cognitive       | Understanding     |
| 3     | Discuss the nursing interventions for each stage of labor.                                                                    | Cognitive       | Understanding     |
| 4     | Discuss fluid and nutritional needs during active labor.                                                                      | Cognitive       | Analyzing         |
| 5     | Differentiate between internal and external fetal monitoring during active labor.                                             | Cognitive       | Understanding     |
| 6     | Discuss fetal monitoring during active labor.                                                                                 | Cognitive       | Understanding     |
| 7     | Discuss the use of common medications during labor, their actions, potential side effects, and related nursing interventions. | Cognitive       | Understanding     |
| 8     | Discuss common methods of anesthesia used during labor, side effects, and related nursing interventions.                      | Cognitive       | Understanding     |
| 9     | Discuss the potential use of imagery and hypnosis during labor.                                                               | Cognitive       | Understanding     |
| 10    | Discuss potential complications of labor and delivery and appropriate nursing interventions.                                  | Cognitive       | Understanding     |
| 11    | Describe nursing interventions in the care of a client following a Cesarean Section.                                          | Cognitive       | Understanding     |
| 12    | Discuss the nurse's role in providing comfort and support to family during the intrapartum experience.                        | Cognitive       | Understanding     |
|       | <u>Demonstration/Discussion/Skill Performance:</u>                                                                            | Psychomotor     | Guided Response   |
|       | a. Monitor fetal heart rate                                                                                                   |                 |                   |
|       | b. Monitor uterine contractions                                                                                               |                 |                   |

### Postpartum Care

| Order | Description                                                                                                                                      | Learning Domain | Level of Learning |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|-------------------|
| 1     | Describe the physiological changes that occur with the postpartum client.                                                                        | Cognitive       | Understanding     |
| 2     | Describe the nursing assessment components and interventions appropriate for the care of the postpartum client.                                  | Cognitive       | Remembering       |
| 3     | Discuss the use of medications commonly used by the postpartum client, their actions, potential side effects, and related nursing interventions. | Cognitive       | Understanding     |

| Order | Description                                                                                                            | Learning Domain | Level of Learning |
|-------|------------------------------------------------------------------------------------------------------------------------|-----------------|-------------------|
| 4     | Identify complications that may occur during the postpartum experience.                                                | Cognitive       | Remembering       |
| 5     | Discuss appropriate nursing interventions while caring for clients experiencing complications.                         | Cognitive       | Understanding     |
| 6     | Describe the role of the nurse in promoting the bonding experience between mother and baby.                            | Cognitive       | Understanding     |
| 7     | . Discuss health education needs of the mother and family, as well as the role of the nurse in providing the teaching. | Cognitive       | Understanding     |
|       | <u>Demonstration/Discussion/Skill Performance:</u>                                                                     | Psychomotor     | Guided Response   |
|       | a. Perform maternal and newborn assessment                                                                             |                 |                   |
|       | b. Teach how to give a baby bath                                                                                       |                 |                   |
|       | c. Teach breast feeding techniques                                                                                     |                 |                   |
|       | d. Teach umbilical cord and circumcision care                                                                          |                 |                   |
|       | e. Perform discharge teaching                                                                                          |                 |                   |

#### Alteration in Cardiac Output and Tissue Perfusion - Maternal

| Order | Description                                                                                                                                                                             | Learning Domain | Level of Learning |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|-------------------|
| 1     | Recognize components of a focused assessment that should be included when collecting data on women who have an alteration in cardiac output and tissue perfusion.                       | Cognitive       | Remembering       |
| 2     | Discuss knowledge of anatomy, physiology, pathophysiology, and nutrition when helping to plan care for women who have an alteration in cardiac output and tissue perfusion.             | Cognitive       | Understanding     |
| 3     | Identify priority actions for women who have an alteration in cardiac output and tissue perfusion.                                                                                      | Cognitive       | Remembering       |
| 4     | Apply knowledge of the actions, potential side effects, and nursing implications when administering medications to women who have an alteration in cardiac output and tissue perfusion. | Cognitive       | Applying          |
| 5     | Recognize alterations in laboratory values related to alterations in cardiac output and tissue perfusion.                                                                               | Cognitive       | Remembering       |
| 6     | Describe the role of the nurse in providing quality care to women who have an alteration in cardiac output and tissue perfusion.                                                        | Cognitive       | Understanding     |
| 7     | Identify health care education and safety needs for women who have an alteration in cardiac output and tissue perfusion.                                                                |                 | Remembering       |

#### Alteration in Regulation and Metabolism - Maternal

| Order | Description                                                                                  | Learning Domain | Level of Learning |
|-------|----------------------------------------------------------------------------------------------|-----------------|-------------------|

| <b>Order</b> | <b>Description</b>                                                                                                                                                            | <b>Learning Domain</b> | <b>Level of Learning</b> |
|--------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|--------------------------|
|              | women who have an alteration in regulation and metabolism.                                                                                                                    |                        |                          |
| 2            | Discuss knowledge of anatomy, physiology, pathophysiology, and nutrition when helping to plan care for women who have an alteration in regulation and metabolism.             | Cognitive              | Understanding            |
| 3            | Identify priority actions for women who that have an alteration in regulation and metabolism.                                                                                 | Cognitive              | Remembering              |
| 4            | Apply knowledge of the actions, potential side effects, and nursing implications when administering medications to women who have an alteration in regulation and metabolism. | Cognitive              | Applying                 |
| 5            | Recognize alterations in laboratory values related to alterations in regulation and metabolism.                                                                               | Cognitive              | Remembering              |
| 6            | Describe the role of the nurse in providing quality care to women who have an alteration in regulation and metabolism.                                                        | Cognitive              | Understanding            |
| 7            | Identify health care education and safety needs for women who have an alteration in regulation and metabolism.                                                                |                        | Remembering              |

#### **Alteration in Ingestion, Digestion, Absorption, and Elimination - Maternal**

| <b>Order</b> | <b>Description</b>                                                                                                                                                                                    | <b>Learning Domain</b> | <b>Level of Learning</b> |
|--------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|--------------------------|
| 1            | Recognize components of a focused assessment that should be included when collecting data on women who have an alteration in ingestion, digestion, absorption, and elimination.                       | Cognitive              | Remembering              |
| 2            | Discuss knowledge of anatomy, physiology, pathophysiology, and nutrition when helping to plan care for women who have an alteration in ingestion, digestion, absorption, and elimination.             | Cognitive              | Understanding            |
| 3            | Identify priority actions for women who have an alteration in ingestion, digestion, absorption, and elimination.                                                                                      | Cognitive              | Remembering              |
| 4            | Apply knowledge of the actions, potential side effects, and nursing implications when administering medications to women who have an alteration in ingestion, digestion, absorption, and elimination. | Cognitive              | Applying                 |
| 5            | Recognize alterations in laboratory values related to alterations in ingestion, digestion, absorption, and elimination.                                                                               | Cognitive              | Remembering              |
| 6            | Describe the role of the nurse in providing quality care to women who have an alteration in ingestion, digestion, absorption, and elimination.                                                        | Cognitive              | Understanding            |
| 7            | Identify health care education and safety needs                                                                                                                                                       |                        | Remembering              |

| Order | Description                                                                            | Learning Domain | Level of Learning |
|-------|----------------------------------------------------------------------------------------|-----------------|-------------------|
|       | for women who have an alteration in ingestion, digestion, absorption, and elimination. |                 |                   |

### Newborn Care

| Order | Description                                                                                                                                                          | Learning Domain | Level of Learning |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|-------------------|
| 1     | Describe the physiological needs of the normal newborn.                                                                                                              | Cognitive       | Understanding     |
| 2     | Discuss newborn assessment, including use of Apgar scores and the importance of testing reflexes.                                                                    | Cognitive       | Understanding     |
| 3     | Describe physical criteria for determining gestational age.                                                                                                          | Cognitive       | Understanding     |
| 4     | Describe common diagnostic tests used for newborns including the purpose of the tests and nursing implications.                                                      | Cognitive       | Understanding     |
| 5     | Discuss care of the normal newborn.                                                                                                                                  | Cognitive       | Understanding     |
| 6     | Discuss nutritional needs of the newborn.                                                                                                                            | Cognitive       | Understanding     |
| 7     | Explain advantages of breast feeding versus bottle feeding.                                                                                                          | Cognitive       | Understanding     |
| 8     | Describe characteristics of preterm, post-term, and low birth weight infants.                                                                                        | Cognitive       | Understanding     |
| 9     | Describe the role of the nurse in providing support to parents of preterm or low birth weight infants, as well as term infants who may be in special care nurseries. | Cognitive       | Understanding     |
| 10    | Describe common potential complications that may occur during the neonatal period and nursing implications.                                                          | Cognitive       | Understanding     |
| 11    | Discuss the use, actions, potential side effects, and nursing interventions for common medications given to newborns.                                                | Cognitive       | Understanding     |
| 12    | Describe the role of the nurse in promoting bonding of the parents with special needs newborns.                                                                      | Cognitive       | Understanding     |

### Basic Concepts of Pediatric Nursing

| Order | Description                                                                                                         | Learning Domain | Level of Learning |
|-------|---------------------------------------------------------------------------------------------------------------------|-----------------|-------------------|
| 1     | Discuss the principles of growth and development and nursing implications in caring for children of all age groups. | Cognitive       | Understanding     |
| 2     | Describe physical and psychosocial assessments for children of all age groups.                                      | Cognitive       | Understanding     |
| 3     | Describe the role of play for children of all age groups.                                                           | Cognitive       | Understanding     |
| 4     | Describe the role of the nurse in caring for children and their families of different cultures                      | Cognitive       | Understanding     |

| Order | Description                                                                                                  | Learning Domain | Level of Learning |
|-------|--------------------------------------------------------------------------------------------------------------|-----------------|-------------------|
|       | and ethnicities.                                                                                             |                 |                   |
| 5     | Identify types of families, their purpose, and implications in caring for children.                          | Cognitive       | Understanding     |
| 6     | Identify the most common safety issues for children of all age groups.                                       | Cognitive       | Understanding     |
| 7     | Identify methods of communication with children of all age groups and their families.                        | Cognitive       | Understanding     |
| 8     | Describe well-child and preventive care provided for children of all age groups.                             | Cognitive       | Understanding     |
| 9     | Demonstrate techniques for safe administration of medications to children of all age groups.                 | Psychomotor     | Guided Response   |
| 10    | Discuss principles of pain management for children of all age groups.                                        | Cognitive       | Understanding     |
| 11    | Discuss the child and family's response to illness and ability to cope with the stressor of hospitalization. | Cognitive       | Understanding     |
| 12    | Discuss the child and family's response to illness and ability to cope with the stressor of hospitalization. | Cognitive       | Applying          |

#### Communicable Diseases - Pediatric

| Order | Description                                                                                                   | Learning Domain | Level of Learning |
|-------|---------------------------------------------------------------------------------------------------------------|-----------------|-------------------|
| 1     | Discuss common communicable diseases of childhood, signs and symptoms, and appropriate nursing interventions. | Cognitive       | Understanding     |
| 2     | Review the Center for Disease's (CDC's) schedule for immunizations to protect against communicable diseases.  | Cognitive       | Understanding     |
| 3     | Describe the nurses' role in promoting scheduled immunizations of children.                                   | Cognitive       | Understanding     |

#### Pediatric Emergencies and Accident Prevention

| Order | Description                                                                                                                                       | Learning Domain | Level of Learning |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|-------------------|
| 1     | Identify risk factors and injuries consistent with child and sexual abuse and neglect.                                                            | Cognitive       | Remembering       |
| 2     | Identify appropriate persons/agencies to who suspected abuse and neglect should be reported.                                                      | Cognitive       | Remembering       |
| 3     | Identify health education and safety needs for children.                                                                                          | Cognitive       | Remembering       |
| 4     | Discuss the pathophysiology, clinical manifestations, emergency management and nursing interventions for children involved in injuries/accidents. | Cognitive       | Understanding     |

**Dehydration and Overhydration - Pediatrics**

| <b>Order</b> | <b>Description</b>                                                                                                                                                                                            | <b>Learning Domain</b> | <b>Level of Learning</b> |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|--------------------------|
| 1            | Recognize alterations in the laboratory values of electrolytes, significant weight change parameters, physiologic manifestations, and changes in child's behavior that indicate dehydration or overhydration. | Cognitive              | Remembering              |
| 2            | Compare and contrast the amount of body surface of newborns, infants, and children.                                                                                                                           | Cognitive              | Analyzing                |
| 3            | Discuss knowledge of pathophysiology when planning care for clients with dehydration or overhydration.                                                                                                        | Cognitive              | Understanding            |
| 4            | Identify priority actions for clients with dehydration or overhydration.                                                                                                                                      | Cognitive              | Remembering              |

**Alterations in Oxygenation - Pediatrics**

| <b>Order</b> | <b>Description</b>                                                                                                                                                               | <b>Learning Domain</b> | <b>Level of Learning</b> |
|--------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|--------------------------|
| 1            | Recognize components of a focused assessment that should be included when collecting data on children who have an alteration in oxygenation.                                     | Cognitive              | Remembering              |
| 2            | Discuss knowledge of anatomy, physiology, pathophysiology, nutrition, and developmental variations when helping to plan care for children who have an alteration in oxygenation. | Cognitive              | Understanding            |
| 3            | Identify priority actions for children who have an alteration in oxygenation.                                                                                                    | Cognitive              | Remembering              |
| 4            | Apply knowledge of the actions, potential side effects, and nursing implications when administering medications to children who have an alteration in oxygenation.               | Cognitive              | Applying                 |
| 5            | Recognize alterations in pulse oximetry and other laboratory values related to alterations in oxygenation.                                                                       | Cognitive              | Remembering              |
| 6            | Discuss the correct use and functioning of therapeutic devices that support oxygenation.                                                                                         | Cognitive              | Understanding            |
| 7            | Describe the role of the nurse in providing quality care to children who have an alteration in oxygenation.                                                                      |                        | Understanding            |
| 8            | Identify health care education and safety needs for children who have an alteration in oxygenation.                                                                              |                        | Remembering              |

| 3            | Identify priority actions for children who have an alteration in ingestion, digestion, absorption, and elimination.                                                                                      | Cognitive              | Remembering              |
| 4            | Apply knowledge of the actions, potential side effects, and nursing implications when administering medications to children who have an alteration in ingestion, digestion, absorption, and elimination. | Cognitive              | Applying                 |
| 5            | Recognize alterations in laboratory values related to alterations in ingestion, digestion, absorption, and elimination.                                                                                  | Cognitive              | Remembering              |
| 6            | Discuss the correct use and functioning of therapeutic devices that support ingestion, digestion, absorption, and elimination.                                                                           | Cognitive              | Understanding            |
| 7            | Describe the role of the nurse in providing quality care to children who have an alteration in ingestion, digestion, absorption, and elimination.                                                        | Cognitive              | Understanding            |
| 8            | Identify health care education and safety needs for children who have an alteration in ingestion, digestion, absorption, and elimination.                                                                | Cognitive              | Remembering              |

#### **Alterations in Excretion - Pediatrics**

| <b>Order</b> | <b>Description</b>                                                                                                                                                             | <b>Learning Domain</b> | <b>Level of Learning</b> |
|--------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|--------------------------|
| 1            | Recognize components of a focused assessment that should be included when collecting data on children who have an alteration in excretion.                                     | Cognitive              | Remembering              |
| 2            | Discuss knowledge of anatomy, physiology, pathophysiology, nutrition, and developmental variations when helping to plan care for children who have an alteration in excretion. | Cognitive              | Understanding            |
| 3            | Identify priority actions for children who have an alteration in excretion.                                                                                                    | Cognitive              | Remembering              |
| 4            | Apply knowledge of the actions, potential side effects, and nursing implications when administering medications to children who have an alteration in excretion.               | Cognitive              | Applying                 |
| 5            | Recognize alterations in laboratory values related to alterations in excretion.                                                                                                | Cognitive              | Remembering              |
| 6            | Discuss the correct use and functioning of therapeutic devices that support excretion.                                                                                         | Cognitive              | Understanding            |
| 7            | Describe the role of the nurse in providing quality care to children who have an alteration in excretion.                                                                      | Cognitive              | Understanding            |
| 8            | Identify health care education and safety needs for children who have an alteration in excretion.                                                                              | Cognitive              | Remembering              |

**Alterations in Mental Health - Pediatrics**

| <b>Order</b> | <b>Description</b>                                                                                                                                                                 | <b>Learning Domain</b> | <b>Level of Learning</b> |
|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|--------------------------|
| 1            | Recognize components of a focused assessment that should be included when collecting data on children who have an alteration in mental health.                                     | Cognitive              | Remembering              |
| 2            | Discuss knowledge of anatomy, physiology, pathophysiology, nutrition, and developmental variations when helping to plan care for children who have an alteration in mental health. | Cognitive              | Understanding            |
| 3            | Identify priority actions for children who have an alteration in mental health.                                                                                                    | Cognitive              | Remembering              |
| 4            | Apply knowledge of the actions, potential side effects, and nursing implications when administering medications to children who have an alteration in mental health.               | Cognitive              | Applying                 |
| 5            | Recognize alterations in laboratory values related to alterations in mental health.                                                                                                | Cognitive              | Remembering              |
| 6            | Describe the role of the nurse in providing quality care to children who have an alteration in mental health.                                                                      | Cognitive              | Understanding            |
| 7            | Identify health care education and safety needs for children who have an alteration in mental health.                                                                              | Cognitive              | Remembering              |

**Alterations in Genetic Development - Pediatrics**

| <b>Order</b> | <b>Description</b>                                                                                                                                                                       | <b>Learning Domain</b> | <b>Level of Learning</b> |
|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|--------------------------|
| 1            | Recognize components of a focused assessment that should be included when collecting data on children who have an alteration in genetic development.                                     | Cognitive              | Remembering              |
| 2            | Discuss knowledge of anatomy, physiology, pathophysiology, nutrition, and developmental variations when helping to plan care for children who have an alteration in genetic development. | Cognitive              | Understanding            |
| 3            | Identify priority actions for children who have an alteration in genetic development.                                                                                                    | Cognitive              | Remembering              |
| 4            | Apply knowledge of the actions, potential side effects, and nursing implications when administering medications to children who have an alteration in genetic development.               | Cognitive              | Applying                 |
| 5            | Recognize alterations in laboratory values related to alterations in genetic development.                                                                                                | Cognitive              | Remembering              |

## GENERAL EDUCATION CORE COMPETENCIES

Southeastern Technical College has identified the following general education core competencies that graduates will attain:

- a) The ability to utilize standard written English.
- b) The ability to solve practical mathematical problems.
- c) The ability to read, analyze, and interpret information.

## STUDENT REQUIREMENTS

Students are expected to complete all exams and daily assignments. A unit exam average of 70% or above must be obtained in order to take the final exam. Students are required to have at least a 70% or higher when calculating the average of the unit exams and final exam before other components, listed under grading policy, will be added for calculation of the final course average/grade. If the students fails to meet the unit exam/final exam expectations, the student will be withdrawn in accordance with the withdrawal procedure.

A final clinical average grade of at least 70% must be obtained in order to pass the course.

A final cumulative average of at least 70% must be obtained in order to progress to future nursing courses.

No assignment opportunities will be given for extra credit. Any unit exam grade will be entered as is to the nearest 10th. No scores will be rounded (up or down). For example: exam has 60 questions and each question will be worth 1.66 pts. The student misses 7 questions  $\times 1.66 - 100 = 88.38$ . Grade will be recorded as 88.3. This rule applies to every grade issued during this semester. All final averages will be recorded as is (for example a 69.9 is a 69.9).

Students must make a **100% on a calculation exam before giving medications at clinical**. Students may take the drug calculation exam a maximum of **THREE** attempts. Each attempt will be a different but similar version. For this exam, students will be allowed 3 minutes per question. There will be a week time frame in between the attempts to allow time for remediation, and the student is required to schedule a mandatory tutoring with an ASN instructor before the next attempt. If a student misses an attempt due to an absence, the student forfeits that attempt and will take the next scheduled attempt. Absences on the third attempt may be evaluated on an individual basis.

The first attempt calculation exam for this semester will be given the **first day of class** of the semester. If the student is **unsuccessful on any attempt**, the **student must attend one hour of remediation after class on the day of the exam**.

It is the student's responsibility to ensure all clinical requirements (immunizations, CPR (cardiopulmonary) certification, etc.) remain up to date throughout the program. The student should provide the updated information to course faculty and upload the information into the clinical management system (My Clinical Exchange). Failure to do so by deadline will result in an occurrence and may prevent the student from being accepted by the clinical facility. Failure to be accepted by the clinical facility may result in dismissal from the program as the student will not be able to complete the course without the clinical component.

## SPECIAL NOTE

During this class, occurrences may be issued for failure to meet classroom/lab requirements (tardiness, uncompleted/late work, and etc.).

Textbook Power Points for RNSG 1030B will be available via the Blackboard course.

## COVID-19 MASK REQUIREMENT

Masks or face coverings must be worn at all times while on the campus of Southeastern Technical College. This measure is being implemented to reduce COVID-19 related health risks for everyone engaged in the educational process. Masks or face coverings must be worn over the nose and mouth, in accordance with the Centers for Disease Control and Prevention (CDC). A student's refusal to wear a mask or face covering will be considered a classroom disruption and the student may be asked to leave campus and/or receive further discipline.

## COVID-19 SELF-REPORTING REQUIREMENT

Students, who test positive for COVID-19 or who have been exposed to a COVID-19 positive person, are required to self-report using the [COVID 19 Health Reporting Form](#). Report all positive cases of COVID-19 to your instructor and [Stephannie Waters](#), Exposure Control Coordinator, [swaters@southeasterntech.edu](mailto:swaters@southeasterntech.edu), 912-538-3195.

## COVID-19 SIGNS AND SYMPTOMS

We encourage individuals to monitor for the signs and symptoms of COVID-19 prior to coming on campus.

If you have experienced the symptoms listed below or have a body temperature 100.4°F or higher, we encourage you to self-quarantine at home and contact a primary care physician's office, local urgent care facility, or health department for further direction. Please notify your instructor(s) by email and do not come on campus for any reason.

| COVID-19 Key Symptoms                                                                                                                                                                         |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Fever or felt feverish</b>                                                                                                                                                                 |
| <b>Cough: new or worsening, not attributed to another health condition</b>                                                                                                                    |
| <b>Shortness of breath, not attributed to another health condition</b>                                                                                                                        |
| <b>New loss of taste or smell</b>                                                                                                                                                             |
| <b>Chills; Repeated shaking with chills</b>                                                                                                                                                   |
| <b>Sore throat, not attributed to another health condition</b>                                                                                                                                |
| <b>Muscle pain, not attributed to another health condition or exercise</b>                                                                                                                    |
| <b>Headache, not attributed to another health condition</b>                                                                                                                                   |
| <b>Diarrhea (unless due to known cause)</b>                                                                                                                                                   |
| In the past 14 days, if you:                                                                                                                                                                  |
| <b>Have had close contact with or are caring for an individual diagnosed with COVID-19 at home (not in healthcare setting), please do not come on campus and contact your instructor (s).</b> |

## EXAMS

If a student shows up late for class on an exam date **or is not prepared to start the test on time (for example: has laptop issues not related to school network, ATI assignments not turned to faculty's specifications, etc.)**, the student may not be allowed to take the exam once the faculty has shut the door. The student will have to make up the test and this will be counted as their opportunity for a make-up exam. Students may be provided time to look at their exam score/rationales in class immediately after testing in Respondus. Students are encouraged to schedule an appointment with their instructor or another ASN faculty

member to view and get further explanation on the missed concepts. In addition, if a student believes a test question needs to be challenged, the student must email their instructor the rationale for consideration. This request must be received via email within 24 hours of the examination. No verbal or text message requests will be granted. The test question and rationale will go before a panel of nursing faculty for decision.

During an examination, students are required to place all textbooks and personal property on the floor in the front of the classroom as directed by the instructor. Students may be separated in different classrooms, assigned different seats, and/or provided desk dividers during testing as informed by the instructor. No talking is allowed once the exam begins. Once the exam begins, students will not be allowed to exit the classroom until the exam is completed and/or turned into the instructor. Smart watches, cell phones, or any other electronic devices will not allowed during exams. Students found with electronic/communication devices during the exam will be considered cheating; which will result in a zero for the exam. All exams are timed with students receiving one minute to answer each examination question. An additional minute will be added per calculation exam question.

### **ASSESSMENT TECHNOLOGY INSTITUTE (ATI) ACTIVITIES**

All ATI activities must be completed as outlined on ATI Activities calendar. **Although previous versions of the assignments may still be available in ATI (example 2.0 or 2016), students are required to complete the most current version of each assignment (example 3.0 or 2019).** Students are required to meet the benchmark (most are 85% or Satisfactory) for each assignment. The faculty will pull the ATI Module Report at **7:00 am on the Monday prior to** the class period as indicated on the RNSG 1030B ATI ACTIVITIES calendar. The faculty will pull the ATI Module Report and failure to successfully complete the assignment by the deadline will result in a 10-point deduction on the unit exam. It is recommended that students take a picture of the final results of each assignment once completed. During clinicals (if applicable), ATI assignments may be your ticket to clinicals. If you do not turn the assignment in by the assigned date, you will not be allowed to attend clinical until the assignment is completed. The clinical day missed will be an unexcused absence. Your ATI Content Mastery Series Maternal Newborn 2019 and Nursing Care of Children 2019 will count 5% of your grade. Please see the ATI Rubric for specifics. You will need to provide both handwritten focused reviews for ATI RN Maternal Newborn Online **Practice Assessment** 2019 A and ATI RN Nursing Care of Children Online **Practice Assessment** 2019 A and complete the 3 hours of remediation for each in order to be eligible to test. If these requirements are not completed, you will receive a zero for that portion on the grading rubric. Both your handwritten focused reviews for the ATI **Proctored** Maternal Newborn 2019 and Nursing Care of Children 2019, as well as appropriate remediation times are due by deadline indicated on the RNSG 1030B ATI ACTIVITIES calendar. These are to be submitted in the Blackboard course Dropbox by the deadline or you will receive a zero for that portion on the grading rubric.

### **TICKET TO CLASS**

Assignments **may** be given as homework which will serve as the student's ticket into class. The student will not be allowed in class if they fail to complete the ticket to class assignment. This will count as an absence and the student will not be allowed to return to class until the assignment is completed in its entirety. Students may be required to wait until the class takes a break before they are allowed to enter as not to interrupt class.

### **SELF-ASSESSMENT JOURNAL-LIFELONG LEARNING ASSESSMENT**

As part of your curriculum and in accordance with the Georgia Nursing Board Rule 410.-8-.04, you are required to keep a journal of your experiences during all didactic and clinical courses; you will continue to make entries until you graduate. By doing so, it is hoped that the entries made in this journal will provide insight into your strengths and weaknesses and assist in your learning experience. The purpose of the journal is to give you a written record of your experiences and professional and personal growth as a nursing student to a registered

nurse.

This self-assessment should help you in determining what you may need to focus on improving, while allowing you to gain a sense of accomplishment at tasks well-done. Re-reading of your journal at intervals during your education should reveal the depth of knowledge you have gained and allow you to see the development of the clinical skills and critical thinking skills required to be an outstanding registered nurse, as well as successful member of the workforce.

Each week, you should write an entry in your journal. You may include your feelings about the week's experiences. If you felt a sense of accomplishment at learning new information, a skill or participating in patient care, then that feeling may be recorded. If you felt a sense of frustration, that may be recorded as well. Your instructors will read your journal! It would be prudent to omit non-constructive personal comments about your instructors or classmates. If there is an issue with a course, clinical, instructor, classmate, etc., the student should discuss these issues with the program director and follow protocol for grievances.

The journal will be in an online format through Blackboard. The journals will be due, as outlined in your course syllabi, **every Monday by 7:00 am**. The journal will be linked to the following courses: RNSG 1019B, 2000B and 2020B. A point per week deduction for not submitting your journal by the date/time due will result in points being taken off your **FINAL AVERAGE**. For example, there will be 16 journal entries due for Fall Semester. If no journal entries were completed, then 16 points will be deducted from your **FINAL AVERAGE**.

### **SIMULATION LAB**

This course may include a simulation lab. Simulation lab prepares students with the evidence-based principles and clinical skills they will need in real world clinical environments. This simulation will help reduce errors, improve safety, and elevate the quality of patient care. With this assignment, the goal is to develop clinical judgment skills that are necessary to function as a professionally trained nurse. A pre-simulation assignment will be given prior to lab day. To successfully complete the simulation activity, the student must turn in his/her pre-assignment as well as a post-simulation evaluation form after completion of activity. This assignment is mandatory. Failure to complete the simulation lab will leave the student ineligible to attend clinical. If the student is planning to be absent on his/her simulation lab day, it is his/her responsibility to notify the instructor and to find another student to swap lab days. Tardiness to simulation lab will be counted as an absence. Be sure to review the student handbook regarding simulation lab regulations.

### **ATTENDANCE PROVISIONS**

Requirements for instructional hours within Health Science programs reflect the rules of respective licensure boards and/or accrediting agencies. Therefore, these programs have stringent attendance policies. Each program's attendance policy is published in the program's handbook and/or syllabus which specify the number of allowable absences. All provisions for required make-up work in the classroom or clinical experiences are at the discretion of the instructor.

Attendance is counted from the first scheduled class meeting of each semester. To receive credit for a course a student must attend at least 90% of the scheduled instructional time. Time and/or work missed due to tardiness or absences must be made up at the convenience of the instructor. Any student attending less than the required scheduled instructional time (90%) may be dropped from the course as stated below in the Withdrawal Procedure. Tardy means arriving after the scheduled time for instruction to begin. Early departure means leaving before the end of the scheduled time. Three (3) tardies or early departures equal one (1) absence for the course. A tardy will be issued if a student has missed less than 20% of instructional class time.

An automatic absence will be issued if the student misses greater than 20% of instructional class time. This averages out to 10 minutes per hour. For example, a class that meets from 9:00-11:30 the student will be considered absent if he/she is not in class by 9:30.

The didactic portion of the class will meet for 60 hours. **For this class that meets 1 day a week for 8 weeks, the maximum number of hours a students can miss is 6 hours during the course. Students missing more than 6 hours will be dropped for exceeding the attendance procedure.**

The clinical portion of this course requires **75 clinical hours (4500 minutes)** during the semester. **A clinical absence will require an excuse or appropriate documentation and all missed clinical time must be made up as required to fulfill the curriculum requirements.** Absences must be discussed with faculty, Program Director and/or Special Needs Coordinator dependent on the circumstances of the absence. Students who do not make up all clinical time missed will be issued a final clinical grade of zero and will be unable to progress in the program. The date and site for makeup time will be specified by the instructor and are non-negotiable. See Clinical Rules for further attendance policies.

Students are informed at the beginning of the semester the proposed dates for clinical. Dates are nonnegotiable. If you are required to be absent from clinical for **special circumstances** like military training or jury duty, you must email the instructor as soon as possible. An individual student schedule will be provided for clinical.

Procedures of the program may be reviewed on an individual basis related to extenuating circumstances related to COVID.

#### **STUDENTS WITH DISABILITIES**

Students with disabilities who believe that they may need accommodations in this class based on the impact of a disability are encouraged to contact the appropriate campus coordinator to request services.

**Swainsboro Campus:** Macy Gay [mgay@southeasterntech.edu](mailto:mgay@southeasterntech.edu), 478-289-2274, Building 1, Room 1210

**Vidalia Campus:** [Helen Thomas](mailto:hthomas@southeasterntech.edu) [hthomas@southeasterntech.edu](mailto:hthomas@southeasterntech.edu), 912-538-3126, Building A, Room 165

#### **SPECIFIC ABSENCES**

Provisions for Instructional Time missed because of documented absences due to jury duty, military duty, court duty, or required job training will be made at the discretion of the instructor.

#### **PREGNANCY**

Southeastern Technical College does not discriminate on the basis of pregnancy. However, we can offer accommodations to students who are pregnant that need special consideration to successfully complete the course. If you think you will need accommodations due to pregnancy, please make arrangements with the appropriate campus coordinator.

**Swainsboro Campus:** Macy Gay [mgay@southeasterntech.edu](mailto:mgay@southeasterntech.edu), 478-289-2274, Building 1, Room 1210

**Vidalia Campus:** [Helen Thomas](mailto:hthomas@southeasterntech.edu) [hthomas@southeasterntech.edu](mailto:hthomas@southeasterntech.edu), 912-538-3126, Building A, Room 165

It is strongly encouraged that requests for consideration be made **PRIOR** to delivery and early enough in the pregnancy to ensure that all the required documentation is secured before the absence occurs. Requests made after delivery **may not** be accommodated. The coordinator will contact your instructor to discuss accommodations when all required documentation has been received. The instructor will then discuss a plan with you to make up missed assignments.

## **WITHDRAWAL PROCEDURE**

Students wishing to officially withdraw from a course(s) or all courses after the drop/add period and prior to the 65% point of the term in which student is enrolled (date will be posted on the school calendar) must speak with a Career Counselor in Student Affairs and complete a Student Withdrawal Form. A grade of “W” (Withdrawn) is assigned for the course(s) when the student completes the withdrawal form.

Students who are dropped from courses due to attendance after drop/add until the 65% point of the semester will receive a “W” for the course.

Important – Student-initiated withdrawals are not allowed after the 65% point. Only instructors can drop students after the 65% point for violating the attendance procedure of the course. Students who are dropped from courses due to attendance or academic deficiency after the 65% point will receive either a “WP” (Withdrawn Passing) or “WF” (Withdrawn Failing) for the semester.

Informing your instructor that you will not return to his/her course, does not satisfy the approved withdrawal procedure outlined above.

There is no refund for partial reduction of hours. Withdrawals may affect students’ eligibility for financial aid for the current semester and in the future, so a student must also speak with a representative of the Financial Aid Office to determine any financial penalties that may be assessed due to the withdrawal. A grade of “W” will count in attempted hour calculations for the purpose of Financial Aid.

**Remember** - Informing your instructor that you will not return to his/her course does not satisfy the approved withdrawal procedure outlined above.

## **MAKEUP GUIDELINES (TESTS, QUIZZES, HOMEWORK, PROJECTS, ETC.)**

A student may only be allowed to make-up one unit exam, which will be given at the discretion of the instructor. A physician’s excuse/appropriate documentation may be required for the student to be eligible to take a make-up exam. A 10 point deduction may be issued if the student misses a unit exam and fails to provide appropriate documentation. The documentation must be submitted to the course instructor(s) within 48 hours of the missed exam. A grade of “0” will be given to all subsequent unit exams missed. The make-up exam may or may not be the same as the original exam. It may also be a different test format. If a student misses the final exam and has already used their ONE time make-up, the student will NOT be allowed to make-up the final exam; which will result in a zero for the final exam.

Procedures of the program may be reviewed on an individual basis related to extenuating circumstances related to COVID.

## **STUDENT SUCCESS PLAN (SSP):**

Our purpose is to educate safe entry-level health care professionals. At times, this may mean there are areas that must be improved upon. The SSP documents deficiencies and provides a means for improvement. A SSP should be initiated for the following reasons:

- if the student has (1) a cumulative unit exam average of < 70% after the completion of 25% of the unit exams or (2) a skill(s) performance deficiency. The faculty will initiate individual counseling session and complete the Student Success Plan.
- if the student has (1) a cumulative unit exam average of < 70% after the completion of 50 % of the unit exams or (2) a skill(s) performance deficiency. The faculty will initiate individual counseling session, as well as review and update the Student Success Plan and submit an Early Alert.

- if the student exhibits behavior outside the expected:
  - codes of conduct outlined in professional codes of ethics, professional standards,
  - all procedures/requirements/policies outlined in program handbooks/documents,
  - STC e Catalog and Student Handbook, and/or
  - clinical facility policies and procedures.

The faculty will initiate an individual counseling session and complete an Academic Occurrence Notice and the SSP. Students are required to submit the SSP within 48 hours and are responsible for meeting with the instructor by the next class meeting.

**(T)echnical College System of Georgia (E)arly (A)lert (M)anagement (S)ystem (TEAMS) & The Student Success Plan** are designed to ensure that students are well informed about strategies for success, including college resources and assistance. One of the responsibilities of the Program faculty is to monitor the academic progression of students throughout the curriculum. The faculty believes that the student is ultimately responsible for seeking assistance; however, faculty will meet or refer students who are having academic difficulties.

- TEAMS is designed to provide assistance for students who may need help with academics, attendance, personal hardships, etc.

### **ACADEMIC DISHONESTY POLICY**

The STC Academic Dishonesty Policy states All forms of academic dishonesty, including but not limited to cheating on tests, plagiarism, collusion, and falsification of information, will call for discipline. The policy can also be found in the STC Catalog and Student Handbook.

### **PROCEDURE FOR ACADEMIC MISCONDUCT**

The procedure for dealing with academic misconduct and dishonesty is as follows:

#### **1. First Offense**

Student will be assigned a grade of "0" for the test or assignment. Instructor keeps a record in course/program files and notes as first offense. The instructor will notify the student's program advisor, academic dean, and the Registrar at the student's home campus. The Registrar will input the incident into Banner for tracking purposes.

#### **2. Second Offense**

Student is given a grade of "WF" (Withdrawn Failing) for the course in which offense occurs. The instructor will notify the student's program advisor, academic dean, and the Registrar at the student's home campus indicating a "WF" has been issued as a result of second offense. The Registrar will input the incident into Banner for tracking purposes.

#### **3. Third Offense**

Student is given a grade of "WF" for the course in which the offense occurs. The instructor will notify the student's program advisor, academic dean, and the Registrar at the student's home campus indicating a "WF" has been issued as a result of third offense. The Vice President for Student Affairs, or designee, will notify the student of suspension from college for a specified period of time. The Registrar will input the incident into Banner for tracking purposes.

### **STATEMENT OF NON-DISCRIMINATION**

The Technical College System of Georgia and its constituent Technical Colleges do not discriminate on the basis of race, color, creed, national or ethnic origin, sex, religion, disability, age, political affiliation or belief, genetic information, disabled veteran, veteran of the Vietnam Era, spouse of military member or citizenship status (except in those special circumstances permitted or mandated by law). This school is in compliance with

Title VI of the Civil Rights Act of 1964, which prohibits discrimination on the basis of race, color, or national origin; with the provisions of Title IX of the Educational Amendments of 1972, which prohibits discrimination on the basis of gender; with the provisions of Section 504 of the Rehabilitation Act of 1973, which prohibits discrimination on the basis of handicap; and with the American with Disabilities Act (ADA).

The following individuals have been designated to handle inquiries regarding the nondiscrimination policies:

|                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                   |

### ACCESSIBILITY STATEMENT

Southeastern Technical College is committed to making course content accessible to individuals to comply with the requirements of Section 508 of the Rehabilitation Act of Americans with Disabilities Act (ADA). If you find a problem that prevents access, please contact the course instructor.

### GRIEVANCE PROCEDURES

Grievance procedures can be found in the Catalog and Handbook located on STC’s website.

### ACCESS TO TECHNOLOGY

Students can now access Blackboard, Remote Lab Access, Student Email, Library Databases (Galileo), and BannerWeb via the mySTC portal or by clicking the Current Students link on the [Southeastern Technical College \(STC\) Website \(www.southeasterntech.edu\)](http://www.southeasterntech.edu).

### TCSG GUARANTEE/WARRANTY STATEMENT

*The Technical College System of Georgia guarantees employers that graduates of State Technical Colleges shall possess skills and knowledge as prescribed by State Curriculum Standards. Should any graduate employee within two years of graduation be deemed lacking in said skills, that student shall be retrained in any State Technical College at no charge for instructional costs to either the student or the employer.*

### GRADING POLICY

| Assessment/Assignment                                                                                                                                                                                                                                                                                                                                                  | Percentage |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| Unit Exams-This percentage is based on 6 unit exams.                                                                                                                                                                                                                                                                                                                   | 50         |
| Final Exam                                                                                                                                                                                                                                                                                                                                                             | 25         |
| ATI Activities- This percentage is calculated based on the ATI Content Mastery Series Maternal Newborn 2019 and Nursing Care of Children 2019. Please see the ATI Rubric for specifics.                                                                                                                                                                                | 5          |
| Clinical- The clinical portion of the course grade is determined based on the clinical preceptor evaluations and clinical paperwork rubric (80%). The grade is assigned by Southeastern Technical College Faculty with input from clinical preceptors. In addition, a health-related teaching plan clinical assignment will count as part (20%) of the clinical grade. | 20         |

**Calculation Examination** - Students must score 100% within 3 attempts in order to progress in the course and program. Students who do not meet the requirements for the Calculation Examination on the third attempt will receive a W for all RNSG courses in which they are enrolled and will not be able to progress in the program.

**\*Clinical requirements for assignments/paperwork will be distributed prior to clinical**

**Each student's final course grade will be determined as follows:**

**Unit exam grade** x 0.50 = \_\_\_\_\_

**Final exam grade** x 0.25 = + \_\_\_\_\_

**ATI Activities** x 0.05 = + \_\_\_\_\_

**Clinical** x 0.20 = + \_\_\_\_\_

**Numerical course grade** = \_\_\_\_\_

**GRADING SCALE**

| <b>Letter Grade</b> | <b>Range</b> |
|---------------------|--------------|
| A                   | 90-100       |
| B                   | 80-89        |
| C                   | 70-79        |
| D                   | 60-69        |
| F                   | 0-59         |

**COMPETENCY AREAS/UNIT OUTCOMES:**

1. Perform a focused health assessment of women, newborns, and children that identifies deviations from normal, as well as health risks.
2. Develop an individualized, evidence based plan of care that demonstrates an appreciation of the diverse backgrounds and developmental variations of women, newborns, and children while making recommendations for the adoption of health-promoting behaviors.
3. Demonstrate clinical judgment when managing the care of women, newborns and children.
4. Identify knowledge of pharmacology, pathophysiology, nutrition, established evidence-based practices and concepts from previous nursing courses when caring for women, newborns, and children.
5. Relate evidence-based knowledge in the management of care provided to women, newborns, and children.
6. Evaluate the efficacy of health-related education that has been provided to women, newborns, and children.

**GENERAL CORE EDUCATIONAL COMPETENCIES:**

- a) The ability to utilize standard written English.
- b) The ability to solve practical mathematical problems.
- c) The ability to read, analyze, and interpret information.

All ATI activities must be completed as outlined on ATI Activities calendar. **Although previous versions of the assignments may still be available in ATI (example 2.0 or 2016), students are required to complete the most current version of each assignment (example 3.0 or 2019).** Students are required to meet the benchmark (most are 85% or Satisfactory) for each assignment. The faculty will pull the ATI Module Report at **7:00 am on the Monday prior** to the class period as indicated on the RNSG 1030B ATI ACTIVITIES calendar. The faculty will pull the ATI Module Report and failure to successfully complete the assignment by the deadline will result in a 10-point deduction on the unit exam. It is recommended that students take a picture of the final results of each assignment once completed. During clinicals (if applicable), ATI assignments are your ticket to clinicals. If you do not turn the assignment in by the assigned date, you will not be allowed to attend clinical until the assignment is completed. The clinical day missed will be an unexcused absence. Your ATI Content Mastery Series Maternal Newborn 2019 and Nursing Care of Children 2019 will count 5% of your grade. Please see the ATI Rubric for specifics. You will need to provide both handwritten focused reviews for ATI RN Maternal Newborn Online **Practice Assessment** 2019 A and ATI RN Nursing Care of Children Online **Practice Assessment** 2019 A and complete the 3 hours of remediation for each in order to be eligible to test.

If these requirements are not completed, you will receive a zero for that portion on the grading rubric. Both your handwritten focused reviews for the ATI **Proctored** Maternal Newborn 2019 and Nursing Care of Children 2019 and appropriate remediation times are due by deadline indicated on the RNSG 1030B ATI ACTIVITIES calendar. These are to be submitted in the Blackboard course Dropbox by the deadline or you will receive a zero for that portion on the grading rubric.

## Instructor/Preceptor Evaluation Tool RNSG 1030B

Student Name \_\_\_\_\_ Date \_\_\_\_\_

Clinical Site \_\_\_\_\_

**\*\* If a score of 1, 2 or 4 is given, please provide comments**

**4 (Outstanding):** Student **exceeds** expectations for a **second semester** nursing student. Demonstrates comprehensive understanding of concepts and applies them to client care, is safe, shows initiative. No supportive cues needed.

**3 (Satisfactory):** Student **meets** expectations for a **second semester** nursing student. Demonstrates fundamental level of understanding of concepts and applies them to client care, is safe, periodically shows initiative. Occasional cues needed.

**2 (Needs Improvement):** Student **does not meet** expectations for a **second semester** nursing student. Requires frequent guidance when applying concepts to client care, is usually safe, infrequently shows initiative. Frequent supportive cues needed.

**1 (Unsatisfactory):** Student **does not meet** expectations for a **second semester** nursing student. Requires consistent guidance when applying concepts to client care, is not safe, lacks initiative. Continuous supportive cues needed.

**NO:** Not observed/No opportunity

| Clinical Performance Outcome-The Student:                                                                                                                                                                                        | Faculty/Preceptor Score |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| Performed a health assessment including physiological, psychological, sociological, and spiritual needs of clients and their families experiencing basic health alterations in a variety of settings.                            |                         |
| Utilized the nursing process to guide the delivery of client care to achieve optimal outcomes.                                                                                                                                   |                         |
| Provided culturally sensitive care to clients and families from diverse backgrounds.                                                                                                                                             |                         |
| Utilized verbal and nonverbal communication techniques that promote caring, therapeutic relationships with clients and their families.                                                                                           |                         |
| Participated as a member of the healthcare team.                                                                                                                                                                                 |                         |
| Used legal tenets to guide nursing practice. (i.e. Student abided by HIPAA)                                                                                                                                                      |                         |
| Displayed professional accountability and responsibility. (i.e. Student was dressed in appropriate clinical attire, was on time, prepared, and acted in a professional manner toward clients and other healthcare team members). |                         |
| Provided a health-related teaching plan developed to address an identified education need for clients.                                                                                                                           | Done in post-conference |
| Utilized communication techniques that support sharing client-related information with members of the healthcare team                                                                                                            |                         |
