This is how I copied my code for the Voki from ANGEL to BB:

- In the ANGEL course, clicked the source button and the code displayed. Clicked Copy.
- Went to my BB course and then went to the HOME page of my course, clicked the arrow next to HOME and chose Page Banner. Clicked the HTML button and the dialog box opened. Pasted my code here and the Voki shows and plays in my BB course.

Some may choose to place it somewhere else but I placed mine in the Page Banner on the HOME page of my course. I also keyed in the course name with the Voki and “dressed” it up some to make it look bigger, etc.

I think I’m going to place mine in the Banner for all my masters. I like it here.

I played and figured it out but have it added in my page banner at the top of the course...looks pretty good. I’ll have to see how I like it there! ☺

I figured out voki! I have one on my announcement page. Very easy, I will email tomorrow.
