## ILP – Grades – Submitting

When submitting grades via Blackboard it is important to complete all three steps listed below in each course section to help ensure the accuracy of the grades being pushed to Banner.

## Step One: Configure/Verify Grading Schema

ILP integration looks for a specifically named grading schema when translating grades in step three (below) so the first step is to make sure that this grading schema exists in the course. **The grading schema must be named Letter.**

1. Locate the **Control Panel**.
  2. Navigate to the **Grade Center**.
  3. Select **Manage**.
  4. Select **Grading Schemas**.

5. Locate the grading schema that is to be used for this course (if more than one grading schema exists). If the grading schema is named Letter move on to the next section, [Step Two: Configure/Verify External Grade](#) (inner document link; jumps to the correct section). If the grading schema is not named Letter, use the steps below to update the name:
    - a. Select the contextual menu chevron to the right of the grading schema title and choose **Edit**.

- b. At the top of the Edit Grading Schema screen edit the **Name** value to **Letter**.

#### SCHEMA INFORMATION

*	Name	Letter
Description		

- c. Verify the schema mapping is accurate.  
d. Select **Submit** to finalize the changes.

IMPORTANT NOTE FOR SCHEMA MAPPING: This mapping should reflect college policy for the course.

- If college policy supports rounding the schema should be mapped as such.
  - Example: 89.5 to 100 is an A

Grades Scored Between	Will Equal
89.5 % and 100 %	A
79.5 % and Less Than 89.5%	B
69.5 % and Less Than 79.5%	C
59.5 % and Less Than 69.5%	D
0 % and Less Than 59.5%	F

- If the college policy does not support rounding the schema should be mapped as such.
  - Example: 90 to 100 is an A

Grades Scored Between	Will Equal
90 % and 100 %	A
80 % and Less Than 90%	B
70 % and Less Than 80%	C
60 % and Less Than 70%	D
0 % and Less Than 60%	F

TIME SAVING TIP: If the college utilizes a master shell process make this change in the master for the course so that each term this step only needs to be verified rather than configured in the term course section shells.

## Step Two: Configure/Verify External Grade

It is important to verify that the correct column in the grade center is marked as the external grade. This indicator tells ILP to use the specific column when populating the course final grade in the last step.

1. Locate the **Control Panel**.
2. Navigate to the **Grade Center**.
3. Locate the column with the **green checkmark icon** to the left of the column name. This icon indicates that the column is the external grade.

Grade Information Bar						
Last Name	First Name	External ID	Total	Assignment 1	Assignment 2	
ADAMS	MICHAEL	910069869	150.00	100.00	50.00%	
Selected Rows: 0						

4. Verify that the external grade indicator icon is on the correct column. If the correct column is marked move on to the next section, [Step Three: Use ILP Integration to Push Grades to Banner](#) (inner document link; jumps to the correct section). If the marked column is not the correct one, use the steps below to update the external grade:
  - a. Locate the column that should be the external grade.
  - b. Select the contextual menu chevron to the right of the column title and choose **Set as External Grade**.
  - c. Verify that the external grade indicator icon (green checkmark) is now on the desired column.

**IMPORTANT NOTE FOR SECONDARY DISPLAYS:** If the external grade column is using both the primary and secondary display settings the secondary display must be Letter for the grades to populate correctly in the last step. If a secondary display schema other than Letter is being used the instructor will need to temporarily change the secondary display to Letter. After grades are submitted the secondary display value can be set back to the schema originally being used.

**MATHMATICAL REMINDER:** Prior to pushing grades to Banner instructors should always verify that the calculations for the external grade column are configured correctly and are accurate.

## Step Three: Use ILP Integration to Push Grades to Banner

This course tool can be used to push grades to Banner as often as needed until the deadline date defined by the college.

1. Locate the **Control Panel**.
2. Navigate to **ILP Integration** under the **Course Tools** section.
3. Select **Final Grades**.

4. In the *Populate final grade from current grade* drop-down select **Final Grade** (this is mapped to the column set as the external grade). The students' letter grades will be populated in the Final Grade column.

Visible Groups	All Participants ▾
Populate final grade from current grade	--Select the column to populate-- ▾
Click "Clear Grades on form" to start over.	--Select the column to populate--
	Final Grade

5. Work Ethics (*skip this step if the college does not require a work ethics grade to be submitted with the letter grade*).
- If a work ethics grade is required, add it to the final grade cell for each student.
  - Spacing is important here so check with the college to determine the correct format.
  - Example: A2 or A 2 where a space is used between the letter grade and the work ethics numerical value.
6. Verify that the grades are accurate and that any grades requiring a last date of attendance (LDA) have the required date.

First Name	Surname	Current Grade	Final Grade	Incomplete Final Grade	Extension Date	Last Date of Attendance
MICHAEL	ADAMS	150.00 (C)	C 2			

7. Select **Submit** to push the grades to Banner.  
 8. A green **Grades submitted** message bar will appear at the top of the screen.

The screenshot shows the ILP Integration software interface. At the top, a green banner displays the text "Grades submitted". Below this, the main title "ILP Integration" is centered. At the bottom of the screen, there is a red navigation bar with four items: "ILP Home", "Midterm Grades", "Final Grades", and "Last Date of Attendance".

NOTE: Once grades are pushed for the first time when the instructor returns to the final grade screen the final grade column will be populated with the last values submitted.

**IMPORTANT NOTE FOR LAST DATE OF ATTENDANCE (LDA):** If a grade requires a last day of attendance to be submitted it must be entered for the student record in the appropriate column in the following format: MM/DD/YYYY. (Example: 05/15/2017)

**IMPORTANT NOTE FOR INCOMPLETES:** Each college will define if the grade I is acceptable via this process. If a grade of I is allowed the Extension date value should be left blank; Banner will automatically use the date as defined by the college.

**IMPORTANT NOTE FOR WITHDRAWALS:** Each college will define if the grade W, WP, or WF are acceptable via this process. If the grade(s) are allowed a Last Date of Attendance (LDA) will be required.
