

# Qwickly ATTENDANCE

## The Most Powerful Attendance Platform Built for Blackboard Learn

Take the pain out of tracking and grading student attendance with Qwickly Attendance.

Qwickly Attendance enables faculty to take attendance that is automatically graded in the Blackboard Grade Center. Faculty can take attendance using an attendance list on screen or allow students to check in on their own browser, complete with a PIN and countdown timer.

### Student Check In

Instructors can allow students to check in to class on their own devices. Checking in allows instructors to skip manually taking attendance and gives students credit for being in class. For extra security, Qwickly Attendance can automatically generate a 4 digit pin for students to enter.

### Customize Statuses

Extend the power of Qwickly Attendance by creating custom attendance statuses like Tardy, Bonus or Early Departure. Each status supports having a percentage of an absence and points, allowing you to tap into the powerful attendance algorithm beneath Qwickly Attendance. System Admins can set up these statuses and even allow faculty to create their own. Here are some examples of how they work:

- Present is worth 100% of the days points, and is 0% of an absence
- Absent is worth 0% of the days points and 100% of an absence
- Tardy could be worth 90% of the days points, and be considered 33% of an absent (3 tardies = 1 absence)

### NEW FEATURES:

#### Multiple Sessions

Take attendance for any class an unlimited number of times per day and name each session if desired.

#### Automatic Grading

Automatically create a grade center column, keep a running grade for each class, and assign desired point values.

#### Absence Statistics

View an aggregate number of absences for each student, including custom statuses that give students partial absences.

#### Custom Email Alerts

Send a customized email to students when they are marked as absent for the day.

#### Excused Absences

Exempt excused students from losing points on sessions when not in attendance.

# Qwickly Inc.

Founded in 2013, Qwickly, Inc. is an educational software company that specializes in user experience enhancements to learning management systems. Based in Cleveland, Ohio, Qwickly creates user-centric software solutions for clients around the world.

Qwickly has been a Blackboard partner since 2013, received an award from the Burton D. Morgan Foundation and is a Flashstarts accelerator company. Flashstarts is the agile startup accelerator focused on unique and innovation uses of software and technology.

## QWICKLY PRODUCTS

- Qwickly+
  - Qwickly+Cloud
  - Qwickly Attendance
- Qwickly also provides custom building block development, including feature enhancements to its own products.

Qwickly products are compatible with self-hosted, Blackboard managed, and SaaS versions of Blackboard.

## QWICKLY BUILDING BLOCK

The Qwickly Building Block for Blackboard Learn provides a micro-platform that increases the efficiency of communicating with members of and managing content in multiple courses and organizations, as well as simplifying tasks that need to be done repetitively in each course an instructor teaches. This platform also creates a connection between popular cloud storage services and Blackboard Learn, which allows posting documents and submitting assignments from the cloud. Qwickly's Attendance tool enables faculty to track attendance that is automatically graded in the Blackboard Grade Center using an attendance list or allowing students to check in.

Qwickly Inc. is a licensed developer for Blackboard, Google, Dropbox, Box, and Microsoft.

Qwickly is used by

**500+**

schools worldwide.

Schools across the world have deployed Qwickly in their Blackboard Learn environment, allowing their users to do repetitive tasks more efficiently, and with greater ease.
